Book Descriptions:

Bugera 333xl infinium owners manual

Risk of death! High voltages of up to 500 V DC may be present inside the casing for long periods after being disconnected from the mains. To avoid lethal electric shock, do not open the casing. There are no userserviceable components inside. Should your BUGERA dealer inspired by its versatility. Whatever style you play, this. First, bring the levels of the amplifier's three problem does not recur. A high damping factor HIGH makes the signal fade out quicker than a low factor LOW. Its 333212 are supplied with 6L6GC power amp valves LED illuminates when the channel is active. The models 333XL and 333XL212 incorporate EL34 power amp valves. The CRUNCH switch activates the CRUNCH channel. The BUGERA amplifier has two paralleled LOUDSPEAKER outputs which are used to connect one or two speaker cabinets. If you only connect one speaker cabinet, be sure that the IMPEDANCE switch is set to match the impedance of the connected cabinet. In addition, the speaker signal of the BUGERA is picked up by a microphone and is fed to the microphone input of the mixer. The information contained herein is correct at the time of printing. All trademarks except BUGERA, the BUGERA logo, and THE SOUL OF VALVES mentioned belong to their respective owners, and such use neither constitutes a claim of the trademarks by RED CHIP COMPANY LTD nor affiliation of the trademark owners with RED CHIP COMPANY LTD. The Clean, Crunch, and Lead Channels all have independent gain structures, as well as their own Volume, Bass, Mid, and Treble control knobs. The Lead Channel also features an analog Noise Gate for controlling noise while using high gain levels. Both the Crunch and Lead Channels have an XL switch, which is designed to provide lowend control, resulting in more highgain chunk while playing aggressively. <http://selmanoglusigorta.com/userfiles/debian-linux-manual.xml>

Additionally, the 333XL INFINIUM is built with Bugera's INFINIUM Tube Life Multiplier Technology, which is designed to lengthen the life of your tubes and optimize their output by dynamically balancing the drive between them to evenly distribute the load. When you do need to replace a tube, the system will indicate which one with its backpanel LED indicators. The amp includes an effects loop that has adjustable Send and Return levels, as well as a boost feature, which can provide added volume to any channel when engaged. You can navigate the three channels with the included footswitch, which can also engage and disengage the effects loop and boost. It is also quite common that customers throw out user manuals are also Try Google Search! No customer has written a text about this; or they have written a text in a different language. 1 1 Customer One customer has rated this product with one star. The sound quality is top notch and on a full stack, riffs and lead notes soar. The only shortcoming, in my opinion, is that the pedalboard could have done with including an independent reverb pedal, hence the reason why I rated it 4 stars in the features department. Oh well, perhaps Bugera will improve on that in the nottoo distant future.

Dont be put off by the fact that its made in the Far East most products even those which are purported to be leading brands are made in the Far East. I simply love it and Im thinking of buying another model by this great brand. Great product! Im making the following addition to my original review over three years after buying it, and after having returned the head to Thomann three times luckily within its warranty period. Alas, the issues kept rearing their ugly heads. Although the ultimate tone and features of the amplifier are exceptional, the problems related having to return the product, the wait, hassle involved do not warrant buying it. In hindsight, after 5 years since purchasing it, it has been sent again to the repair shop. This time the problem seems to be the builtin relay switch connected with the footswitch. For the reasons stated above I would not recommend it. Send report Total handling features sound quality Great at amp at low cost 30.12.2016 I use this amp in my studio for reamping guitars and sometimes for band rehearsals. I also own an Engl savage 120 and I have to say that the sound coming out of Bugera is similar to that of the savage with the former having better low end response, something that was obvious when I reamped the same signal using the same setup cabinet, mics etc. If I had to take an amp out on the road for gigs I wouldnt take this amp, I dont think it could handle it very well, that is why it stays in the studio for reamping, and this, it does well. The power tubes are nice, but didnt like the preamp tube, but thats what a tube amp is like, you have to experiment with different tubes. It is versatile with its 3 band EQ per channel and I like the XL switch assigned at the crunch and lead channel. For the price tag, it is a good deal, but handle it with care. Send report Total handling features sound quality Top quality Ntanolas, 30.03.2020 Great sound from an amp that doesnt cost an arm and a leg.

The amp has master and channel volume meaning that you can get it sounding great even at bedroom volume. Send report Total handling features sound quality Bugera 15.07.2014 I have owned this head for a little while now and have come to love it. It certainly packs a punch at 120 Watt. I couple this head with the matching cabinet and it sounds great!. The head has 3 channels which is great for having access to different gain settings between crunch and lead channels at a push of a button. The 3 band EQ when altered to achieve a desired tone is very responsive. With scooped mids you can achieve very dirty drop tuned kinds of tones for example for Dream Theater sort of style playing; and if you plug a strat or vintage tele into to the low gain guitar input with a nice amount of mids and highs you can achieve true Gilmore textures. This amp also has a great clean channel, very pristine with a good bottom end, and amazing features such as the infinium tech which allows you to change a valve mid gig if need be as no biasing is needed and valves do not need to be matched pairs. You can also use combos of 6L6 and EL34 at any given time. Not only that but the amp tells you via led which valve has blown. An FX loop is also a brilliant feature of this amp even though a lot of amps have them it is nice to use it with this one. You couldnt go wrong with this amp for the money. By far the best in the price range. Send report Read all 103 reviews Rate product VAT Available immediately Available immediately This item is in stock and can be dispatched immediately. Standard Delivery Times Guitar Amps The following pages give an overview of the various types of guitar amp available. Valves do not light. Valves do not light. Amplifier does not power up. Valves do not light. Replaced fuse on rear panel but problem persists. Steve Murdock Steve, Thats a nice. This amp is made off shore but is popular and sold in the US. No supplier can help.

Patrick Hallford 15 August at 0356 Need a little help with my 333xl. It's the Infinium version. Recently retubed the amp power and preamp and was working great. Now I turn it on and there's no volume. Power section works fine can get sound by going through fx loop.

BANGKOKSOLARPOWER.COM/syner_upload/images/files/compair-compressor-manual.pdf

Nothing when I go into the front of the amp on either input. Did some searching but it seems like what I'm finding may or may not relate to the issue I'm having.. What's the best starting point to troubleshoot on something like this. Tubes, fuses See more William Spesshardt 14 August at 1818 Finally giving this set up a try, perfect bedroom setup. Dave Angus is looking for recommendations. 15 August at 1424 I have a gen 1 6262 blue lights the relay the holds the amp in the drive channel lets go after the amp heats up 30 to 40 mins. I know the problem. does any one know a fix or the part I need. I can do repairs and have been in the amp before. a real pain by the way help I have a gen 1 6262 blue lights the relay the holds the amp in the drive channel lets go after the amp heats up 30 to 40 mins. I know the problem. does any one know a fix or the part I need. I can do repairs and have been in the amp before. a real pain by the way help Noel C Emmanuel 14 August at 0551 My Bugera 1990 NO SOUND Pre amp tube; V5 no glow, V6 one orange spot and V7 two orange Help me My tubes run good on other amps. I have replaced burn out tubes too Kris Luoma uploaded a file. 15 August at 0809 This content isn't available at the moment When this happens, it's usually because the owner only shared it with a small group of people or changed who can see it, or it's been deleted. When this happens, it's usually because the owner only shared it with a small group of people or changed who can see it, or it's been deleted. Sean Baptist is in Texas. 15 August at 1342 Bugera under the night stand as well Noel C Emmanuel 15 August at 0429 Bugera 1990 Lead channel not firing up loud as the clean channel does. What's wrong Bugera 1990 Lead channel not firing up loud as the clean channel does. Since I forgot to turn it off, and left it on for 24 hours, the volume goes from normal to extremely low after a couple minutes of playing, or as soon as I hit it with an overdrive.

The closest authorized repair shop is in Germany, and I live in Norway, so sending by mail would cost almost as much as buying a new amplifier. All help would be appreciated. Juan Manuel Gozalo 15 August at 1026 Hi to all. I'm the owner of a wonderful Bugera v5 Infinium first edition with Bugera branded speaker and I'm very happy with it but, because the amp is so good, I want to plug it to an external cabinet with a 12 inches Weber speaker. And there's the problem. What does it mean? That's a 4 ohms out That is a connection in which I could plug an external cabinet of 4, 8 or 16 ohms without problem because can handle any of them. Something else Please help me. I want to buy the proper speaker for my amp and the documentation of Bugera don't help about this topic. Thanks in advance! Chris Morgan 14 August at 2152 Alright Bugera crew, I've got an Infinium T50 that just

sounds muddy and flat after it warms up. The preamp tubes are about two years old so Ive ordered a new set but whats the likely hood thats the issue. Anything else I should be looking at. Ive tri d several different guitars, cables, pedals, no pedals. I feel like its gotta be the 12ax7s. Tim Bartley 15 August at 0140 so, from what i hear the infinium series of bugeras dont need biasing if you need to replace a tube, you can just pop it in, i am new to this whole tube amp game Erik Lee Croq shared a link. 14 August at 0921 Hello Voici ma derniere video avec ampli Bugera V55 Gibson Les Paul Classic 1997 Pinstriping Ampli Bugera V55 youtube.com The Bodyguard Whitney Houston Run to You guitare cover Gibson Les Paul Classic 1997 Pinstriping Ampli Bugera V55 Gibson Les Paul Classic 1997 Pinstriping Ampli Bugera V55 Philip Rodden added a 3D photo. 8 June Upon advice from someone I upgraded the factory tubes in my V5, put in Groove Tubes, and my fave amp went from fantastic to interstellar incredible. I changed my speaker to the one my marshall had in itcelestion.

Please activate JavaScript and reload this website. These include a totally Clean chann. Data will only be sent via social networks with your consent. These include a totally Clean channel that won't break up; a Crunch channel for a "halfway dirty" rock and blues tone or crank the gain for a metal rhythm tone; and a Lead channel with the same structure as the Crunch channel, but with access to more gain. Each of these channels has its own volume feeding the overall master volume, giving you total control over the level of each. The revolutionary INFINIUM Valve Life Multiplier technology is like having your very own technician inside your amp constantly monitoring and tweaking valve performance for the ultimate in tonal integrity and reliability. This revolutionary circuit not only optimizes the performance of each output tube, it dynamically balances the drive between them to more evenly distribute the load. With INFINIUM, your tubes last up to 20 times longer, saving you substantial money over the lifespan of your amplifier. INFINIUM also compensates for the effects of aging, automatically adjusting current levels to keep your valves sounding as good as the day they were installed. If and when a valve does reach the end of its life, the system even tells you which one to replace. All you need do is replace the faulty valve and let INFINIUM take care of the rest for you. This all adds up to more consistent sound quality and longer life for your valves. Maintenance for valve amps has never been this easy! Bugera Power Output Watt EL34 Number of Channels Yes Internal Effects. No Effects loop. Yes Recording Output. No Headphone Connection. No AUX Input. No MIDI Interface. No Foot Switch Connection. Yes Incl. Foot Switch. Yes Speaker Connection Plus it has the Infinium tecnology that rocks as far is a know.! And its build like a tank!!!! You should try one too!!!!!!!! Lead channel with very high quality reverb is great for soloing.

And you can get very powerfull gain for the rythm guitar. You dont need any pedals to get the greatest metal tone ever. And it has a very good clean channel too. Very versatile amp and the sound is great even at low volumes. Low price with super fast delivery. The shipping took only few days. From now on, i will buy everything from Music Store. Its reliable and very fast. Ensure that you entered a valid email address or try again later. With cookies we can remember your settings and provide you with better offers.
